

## **2010-11 Asbestos Notification**

### **To all Parents, Guardians and Employees of Sargent RE-33J Schools**

Colorado Reg. 8 section IV requires a yearly notification of related asbestos activities that have occurred in the past year or will occur before the next notification.

The asbestos management plan is located in the principal's office of each school and plans for all buildings are located in Superintendent's office. The buildings which contain asbestos are checked every six months for any changes in condition of materials. If necessary, actions will be taken to keep buildings in a safe condition.

Jeff Johnson, the designated person, has checked all visible asbestos containing materials every six months for changes.

The maintenance and custodians are due for awareness training update.

The buildings and asbestos program are in good and a safe condition.

Lauren Sheldrake  
Superintendent
